Frontend: React.js, GSAP, Tailwind, HTML, CSS

Backend: Node.js, Express.js, REST APIs, Salesforce Integration

Database: MySQL, MongoDB

Developer Tools: VS Code, Git, Postman, Docker

Soft-Skills: German Speaking (A2 level), Public Speaking, Time Management, Discipline

EXPERIENCE

Qualitia Software | Junior Software Developer | 13 November 2025 – Present

- **Salesforce Integration**
 - Researched and developed support for **Salesforce custom components**, including **LWC, Aura, and Visualforce**, taking the feature from R&D to implementation.
 - Worked with **Salesforce REST API** and **Bulk API**, using **SOQL queries** to retrieve and process the required Salesforce data.
 - Built **parsers** for all three component types to extract the required data directly from their source code.
 - Optimized the processing logic by reducing **time complexity**, resulting in a **68.2% average reduction in processing time** across the repository.
- **Electron App & Engine**
 - Developed a **private-key-based login feature** for **Salesforce** to automate authentication and reduce **manual multi-factor authentication (MFA)** steps during the login process.
 - Used Private key to generate **JWT token** and exchange it with Salesforce for an **access token**.
- **Web Recorder & Web Object Spy**
 - Automated the connection between the **web extension and Electron app**, eliminating the need for manual connection/setup.
 - Implemented logic to detect whether the web extension is installed and automatically establish the connection when available, otherwise notify users about the missing extension and guide them through the installation process.

Techpawn Solution | ERP Developer Intern | 4 November 2024 – 6 February 2025

- Developed and customized **Odoo website pages** using **XML and CSS** to enhance UI/UX.
- Worked on **Odoo module development**, improving business workflows and system functionalities.
- Contributed to key projects:
 - **Okio** – Designed and customized the **Odoo website** for this project, implementing **responsive UI** with XML and CSS to enhance user interaction. Optimized the website layout and improved navigation for a seamless experience.
 - **Link** – <https://www.okio.la/>
 - **Escarra** – Worked on **Odoo ERP customization**, enhancing module functionalities to streamline business operations. Focused on improving system workflows, UI enhancements, and module optimizations.
 - **Link** – <https://escarra.com/>
- Gained hands-on experience with **Odoo's web framework, Python, PostgreSQL**, and ERP customization.
- Collaborated with cross-functional teams to troubleshoot and implement solutions.

- Recognized as **Intern of the Month** for outstanding contributions.

PROJECTS

Automatic Expense Tracker | *Mongo, Express, React, Node, React-Native*

- Automatic Expense Tracker captures text SMS from your mobile devices automatically, so you don't have to manually update it.
- It uses a **Message Support App** which is the backbone for Automatic Expense Tracker.
- It helps to visualize the expense data in form of bar graphs for different time periods, and also allows to download expense data in Excel format.
- Github :- <https://github.com/RishiDevs3248/Automatic-Expense-Tracker>

Smart Hire | *React, Python, Ollama 3.1*

- It is a AI based Web Application that helps the HR to understand the level of understanding of the skills mentioned in the resume .
- It uses **Ollama 3.1** to generate Quiz Questions based on the mentioned skills in the resume.
- It also recommends free documents / courses to job seekers if they need to improve certain skills
- Github :- https://github.com/RishiDevs3248/Smart_Hire

College ERP | *Mongo, Express, React, Node*

- Collage ERP (Enterprise Resource Management) Project for collage has 3 people – Admin, Teacher, Student
- Teacher can do many tasks like attendance marking, Update / Create Timetable/Assignment .
- Student can access all Tasks And get Email Notification.
- Github :- <https://github.com/RishiDevs3248/College-ERP>

Technobash Event Website | *React, Tailwind CSS* (<https://technobash.shanacoder.com/>)

- Collaborated in building a dynamic and responsive event website for our college's annual technical fest: **Technobash**.
- Designed and developed interactive UI components using **React** and **Tailwind CSS** to ensure smooth navigation and a clean visual experience.
- Helped showcase event details, schedules, and registration in a visually engaging and mobile-friendly layout.
- Github :- <https://github.com/ankitkumar0008/technobash>

Destify | *React, HTML, CSS* (<https://destify-theta.vercel.app>)

- Used **AI API** to generate preferable destination for users based on their input.
- User gives input like Preferences, Budget, No of travellers.
- Use **Gemini Api** provided by google.
- Github :- <https://github.com/RishiDevs3248/Destify>

EDUCATION

Genba Sopanrao Moze College of Engineering

Bachelor of Engineering in Computer Science (8.81 CGPA)

Nov 2021 – April 2025

Balewadi, Pune, India

Shri Mhalsakant Secondary & High Secondary School, Akurdi

Intermediate, PCM (84.5 %)

June 2021

Pune, Maharashtra, India

PDEA's English Medium School, Pune

Matriculation (78.20 %)

June 2019

Pune, Maharashtra, India
